

Virginia Smallsat and Open Data Hub for Research and Commercialization (VSODHRC)

Vision

- Establish VDHRC that will serve as the long-term sustainment entity for Space, Autonomous, Systems, and Ground Based Data to be used for Research and Commercialization
- Operating entity for future State and federal research grants and users driven applied research and commercialization activities
- Member networking and collaboration-focused events
- Structured entity under the under ODU VP for Research/VMASC
- Operated as a standalone enterprise with its own branding, leadership, and governance structure
- Leverages the organizational support capabilities within VMASC IIE, and the ODURF.
- User driven funding model (TBD)

Objectives

- Create new pathways to obtain, integrate, disseminate, and monetize satellite, unmanned systems, and ground based data
- Entrepreneurs & innovators identify unmet market needs, problems and develop viable business models
- Includes sources of relevant demographic, economic, social, cultural, and political data
- Establish connections with financial, intellectual, and social enterprises necessary to grow new companies
- Supports faculty research internal ODU users (Strome College of Business, Dragas Center, Colleges of Sciences, Engineering, etc.)
